**Customer :** NJ Wastewater Treatment Facility  
**Location :** NJ  
**Specialist :** Kevin Bernick  
**Solution :** Pulsarlube V with Chesterton 615 #2 Grease  
**Date Installed :** August 1, 2006

**Results :** I installed 2 Pulsarlube V units on 1.25" bearings on a Hayward Gordon recirculation pump. The units were set for 6 months. Since installing the Pulsarlubes no bearings have been lost and lubrication has been guaranteed to the pump when it was done manually in the past.
